Evidence-based Clinical Practice

5-7 October 2017

Presented by: Jennifer Bolton & Amanda Jones-Harris

This course is all about bridging the gap between research and clinical practice, the quintessential leap that is evidence-based practice in the modern healthcare environment.

	Early Bird	After 18/09/17
AECC GA/TAM/ECU/RCC	£125	£156
Non Members	£150	£188
Students	£ 50	£ 63

Early bird discount for bookings received on or before 18 September 2017

Course Synopsis

Today's healthcare environment is all about evidence-based practice. Do you know what this means, and perhaps more importantly, do you have the skills to carry out clinical practice based on sound research evidence? It is a fallacy that evidence-based practice is aimed at researchers. Evidence-based practice is about clinicians working in everyday routine practice, and how they can apply research evidence in the management of individual patients. You may feel intimidated by the vast amount of new research evidence and the new ways in which it is being reported such as systematic reviews and clinical guidelines. This is your opportunity to get to grips with evidence-based practice at the level that is meaningful and relevant to you as a practising chiropractor.

This course will cover:

- Understanding the principles of evidence-based practice and how these are translated into your clinical practice at the level of individual patients.
- Finding useful information from the research literature to answer a clinical question about one of your patients.
- Reading research papers and making sense of them.
- Transferring research findings (evidence) out of the research setting and into your own clinical practice.
- Applying research evidence to solve a clinical problem about one of your patients.
- This course is all about bridging the gap between research and clinical practice, the quintessential leap that is evidence-based practice in the modern healthcare environment.

Jennifer Bolton, Phd, MA, Ed, ILTM, FCC (Hon); is a Professor in Chiropractic Education and Vice Principal of Research & Postgraduate studies at the AECC. Prof Bolton's research interests lie in evidence-based practice, clinical outcomes and education. She has published over sixty full research papers in peer-reviewed literature.

Amanda Jones-Harris, BSc, DC, MSc, Dchiro, FCC (Ortho), FHEA; is a senior lecturer at the AECC and programme leader for the chiropractic programmes. She is currently the lead lecturer in orthopaedics and rheumatology on the undergraduate chiropractic course and the pathway leader of the MSc advance professional practice (orthopaedics). Amanda's research interests lie in the healthcare role of chiropractors, evidence-based practice and medical education.

ACCREDITED FOR 16 CPD POINTS BY THE EUROPEAN ACADEMY OF CHIROPRACTIC

Registration: Thursday: 10:15

Thursday 10:30 - 17:00

Friday 09:00 - 16:30

Saturday 09:00-12:30

Lunch & Refreshments provided
