Kinnective Instrument Assisted Soft Tissue Manipulation 21-22 April 2018

Presented by: Kay Pearce & Donna Strachan

Kinnective is a form of instrument-assisted soft tissue manipulation that chiropractic clinicians have reported may be useful in breaking down scar tissue, fascial restrictions and adhesions and may change muscle tone.

	Early Bird	After 19/03/18
AECC GA/TAM/ECU/RCC	£260	£325
Non Members	£286	£358
Students	£130	£163

Early bird discount for bookings received on or before 19 March 2018

The objective of the Kinnective IASTM courses is to teach Instrument Assisted Soft Tissue Mobilisation techniques. Whether you are a therapist with an injured patient or a trainer who's client needs more range of movement through various areas of their body.

Kinnective courses are practically oriented, with extensive emphasis on technique that can be applied with your patients the next day. Instrument Assisted Soft Tissue Manipulation is an effective and powerful technique when applied correctly, but can also be used incorrectly with significant consequences.

By the end of the course participants should be able to correctly identify and treat soft tissue dysfunctions that are amenable to treatment through the use of this modality.

Kay Pearce. MSc., DC., ICSSD. Doctor of Chiropractic Kay graduated from Chiropractic college in 2001 and was first introduced to Instrument Assisted Soft Tissue Mobilization as part of her post graduate diploma in sports Chiropractic. She has been using leading forms of the technique since 2005 and in 2009 was asked to be a European instructor for Graston Technique. In 2015 Kay completed a PG Dip in MSK ultrasound. Kay has worked trackside at the European Veterans Athletics Championship and treated athletes at the British Masters Track & Field Championships. In 2012 she was based in the sailing village polyclinic for the Paralympic games.

Donna Strachan. MSc., DC. Doctor of Chiropractic Co-designer and developer of Kinnective, Donna predominantly spends her time in private practice and on a consultancy basis for sports. She spends a lot of time lecturing and in 2011 organised the International Muscle Pain Conference at Salford University in Manchester which brought together renowned experts in the field such as Sigfried Mense, Antonio Stecco and Andre Vleeming. Donna graduated from the AECC in 2001 working in full time practice since and opening her own clinic in 2003. She began using Instrument Assisted Soft Tissue Mobilization in 2003 and began lecturing for Graston in 2009 and FAKTR in 2010. She has consulted on Instrument Assisted Soft Tissue Mobilization for the RFU, EIS, UKA and FA and has been selected to work as part of the medical team at the Stratford Polyclinic for the London 2012 Olympics.

**** Please note that instruments will be available for you to use at the seminar. They will also be available to purchase prior to the seminar, once you have booked more details will be emailed to you about this closer to the seminar date ****
