Clinical Audit & Research Methods

11-14 October 2017

Presented by: Jennifer Bolton, Amanda Jones-Harris & Peter Miller

Please book online at www.aecc.ac.uk/cpd

	Early Bird	After 11/09/17
AECC GA/TAM/EAC/RCC	£175	£220
Non Members	£195	£244

Early Bird discount for bookings received on or before 11 Sep

Course Description

Whether audit or research, generating scientific evidence involves collecting and analysing observations using systematic and logical procedures. For clinical audit, routine clinical data are compared against pre-determined standards. Research on the other hand, involves setting questions that can be answered using set research designs and methodologies. This programme will cover both quantitative and qualitative research methodologies as well as those used in health services evaluation research. These seminars provide an overall package specifically aimed at the practising clinician to properly plan and conduct audit and research, and maximise their potential in informing the care of patients.

- Understanding scientific inquiry
- Conducting clinical audit including standard setting
- Quantitative research designs including surveys, service evaluation, case-control, cohort, RCT and diagnostic testing
- Qualitative designs including phenomenology
- Data analysis using SPSS
- Writing up research and audit studies

This programme is open to all practising healthcare professionals.

Jennifer Bolton, PhD, MA, Ed, ILTM, FCC (Hon); is Vice Principal (Postgraduate and Research) at the AECC. Prof Bolton's research interests lie in evidence-based practice, clinical outcomes and education, and she has published over sixty full research papers in peer-reviewed literature.

Amanda Jones-Harris, BSc, DC, MSc, DChiro, FCC (Ortho) is a senior lecturer at AECC. She is currently the lead lecturer in Neuro-orthopaedics on the undergraduate MChiro course and the pathway leader for the MSc Advance Professional Practice (Orthopaedics). Amanda's research interests lie in the healthcare role of chiropractors, evidence-based practice and medical education.

Peter Miller, BSc, DC, MSc, DChiro, FRCC (Ortho), FHEA is Principal Lecturer in clinical management at AECC. He has taught reflective practice principals for the past 15 years. His research interests are in qualitative research, neurophysiology of manual therapy and educational research.

27 CPD Hours

ACCREDITED FOR 27 CPD POINTS BY THE EUROPEAN ACADEMY OF CHIROPRACTIC

Registration: Wednesday 09:30 / Thursday 09:00

Wednesday: 09:45-17:00

Thursday: 09:15-18:00

Friday: 09:00-17:45

Saturday: 09:00-15:00

Light lunch and refreshments included
