## The Chiropractic Adjustment Thoracic & Upper Extremity 27 January 2018

**Presented by: Angelo Battiston, DC**

The seminar will consist of a short presentation of the evidence-based effects of the chiropractic adjustment, followed by a hands-on technique class with emphasis on the thoracic and shoulder complex, the elbow and wrist/hand.

	<b>Early Bird</b>	<b>After 2/01/18</b>
AECC GA/TAM/ECU/RCC	£150	£188
Non Members	£165	£207
Students	£75	£94

Early bird discount for bookings received on or before 2 January'18

This will be an opportunity to refine your fine psychomotor skills learnt in the previous years of study and or clinical practice. There will be plenty of practical opportunities during the practical adjusting seminar to perfect these skills while adding to your bouquet of clinical skills a combination of several distinct chiropractic techniques under the useful supervision of the presenters.

### **Seminar Goals:**

- Being able to explain the effects of the chiropractic adjustment to patients and other health care practitioners.
- Develop a better understanding of the upper extremity complex
- Add a new skill to your toolbox
- Improve your adjustment skills

### **Monday morning you will be able to:**

- Have a clear view on the physiological effects of your treatment
- Apply a new thought process to the common upper extremity complaints
- Apply a new set of skills to your treatment methods

**Angelo Battiston**, BSc, DC, MSc(Sports and Rehabilitation), PG Cert (Med.Ed.), ICSSD, FEAC, CCEP, FHEA. **Clinical Tutor / Programme Leader MSc (FMS Health)** Angelo continuously uses case studies as research into the feasibility for spinal pelvic stabilizing orthotic usage across all population groups. He has established a series of CPD seminars involving a uniquely developed Upper Cervical Specific approach to patient care and a Table Assisted approach to patient care. Angelo is establishing a series of CPD seminars involving the Chiropractic Management of the Adolescent Population with a specific interest in sport.

**ACCREDITED FOR 8 CPD POINTS BY THE EUROPEAN ACADEMY OF CHIROPRACTIC**
