

ADVANCED VESTIBULAR NEURO-REHABILITATION FOR WHIPLASH AND CONCUSSION

IS THIS SEMINAR FOR YOU?

- ? You're a Chiropractor, Physiotherapist, Osteopath or Occupational Therapist looking at improving your clinical competency in managing patients with concussion, whiplash, chronic neck pain, dizziness and poor balance.
- ? You're a new graduate or experienced practitioner, either with little to no experience in neurology and vestibular rehabilitation.
- ? You desire to make a big difference with an increasing number of patients suffering sporting injuries, motor vehicle accidents and falls.
- ? You're fed up with poor results using standard musculoskeletal therapies and outdated principles.
- ? You've been looking for an integrated brain-based approach in managing challenging cases.
- ? You learn best when there is a mix of lecture material, reinforced with hands-on practicals.

WHAT YOU WILL LEARN

- 1 ✓ The similarities between whiplash and concussion and how to differentiate between them.
- 2 ✓ International Guidelines, policies and position statements.
- 3 ✓ Pathophysiology of concussion, from a biomechanical, sensorimotor, neurological, cognitive/neuropsychological, and a metabolic view.
- 4 ✓ Advanced brain-based techniques to fix the most challenging chronic neck dysfunction and whiplash cases.
- 5 ✓ How to perform an evidenced-based assessment, including cervical joint position error, eye movement, balance, vestibular, memory and cognitive, as well as imaging.
- 6 ✓ Enhance your traditional spinal therapies with the latest vestibular neuro-orthopaedic rehabilitation.
- 7 ✓ How to prescribe and perform a tailored brain-based management protocol that addresses the sensorimotor, vestibular, cognitive and nutritional aspects.

12 HRS
ECU APPROVED

LOCATION

HELSINKI LILA ROBERTS HOTEL
22-23 SEPTEMBER
SUNDAY 9AM-6PM,
MONDAY 9AM-1PM

PRACTITIONER INVESTMENT

NO VAT

TICKET TYPE	VERY EARLY BIRD# ENDS 31 MAY	EARLY BIRD ENDS 23 AUGUST	NORMAL
Practitioner	€395	€445	€495

Sit down lunch and morning/afternoon breaks provided. # limited to 5 tickets only.

PRESENTED BY DR CARLO RINAUDO

BMedSci(Hons) MChiro ICSSD DACNB PhDcand

Carlo has been a Chiropractor for over 19 years, with post-graduate training in clinical neuroscience and rehabilitation. He previously lectured at Macquarie University and now teaches practitioners both in Australia and overseas on vestibular related topics. He is currently undertaking a PhD in Neuroscience (Vestibular Rehabilitation) at UNSW/NeuRA, working with the best researchers and neurologists in the field. The addition of being the clinic director of a neurological referral multidisciplinary practice, Carlo is the ideal choice for presenting the integration of research and clinical applications on the topics of dizziness, concussion, poor balance and whiplash conditions.
