About the Webinar

Erchonia have run a plethora of educational lectures and workshops in recent months in an effort to explain Low Level Lasers in better detail, and their multiple uses, including electromagnetic energy transfer via the Erchonia range of low level lasers. In this webinar, we welcome questions in relation to **'HOW TO PROTECT YOUR BRAIN using Low-Level-Laser Therapy in Integrative Neurology'**. Let us share the experiences from the expert panel talking about combining non-thermal low level laser in with your current treatment programme, with a special mention to the following:

Brain Inflammation

Brain Barrier Systems

Neurodegeneration

Neurochemistry

Brain/concussion

Battle against Opioids

Neuro Pre-hab

Brain-based Pain Management

Discover how non-thermal low-level lasers can help normal adaptive physiology and how to integrate low-level laser technology (3LT®) in to your neurological practice

In this webinar, talk to the experts live on video feed from Scottsdale, Surrey, County Cork and Falun (Sweden). **Ask the panel** anything you want from what you have seen, and what you haven't, they are at your beck and call! Transform outdated thinking on laser therapy and keep 'defying the dogma', our patients deserve the best!

Takeaways:

There are varying technologies out there to compliment what you already do as a practitioners when it comes to mental health and wellness, but how effective are they, and is there something else that can achieve higher levels of efficacy and safety? In this webinar you will hear live from the experts to show you how combining your current techniques with class 2a 'TRUE' non-thermal low level laser can accelerate pain relief and healing, thus increasing patient outcomes and overall quality of life, expanding your ability to practice at a higher level.

TREVOR BERRY DC, DACNB

Dr Trevor Berry, DC, DACNB

Dr. Berry was born and raised in Alberta, Canada. He completed his pre-medicine requisites at the University of Calgary and went on to complete his Doctorate at Parker University in Dallas, Texas. He graduated Magna Cum Laude, Salutatorian and was the recipient of many academic awards including the Parker Scholastic Excellence Award. He went on to become a board-certified Chiropractic Neurologist in 2001 and has over 2500 hours in post-doctoral studies in neurology, functional medicine and low-level laser therapy.

He is involved in multiple laser studies and has been the principle investigator on Level 1 FDA studies. Dr. Berry lectures for BTB Health Systems, nutrition companies, lab companies and about low-level laser. Because lasers profoundly influenced his own health status, Dr. Berry has dedicated himself to bringing the innovative laser applications to the health care system.

JAKE COOKE MChiro, DACNB

Dr Jake Cooke, MChiro, DACNB, graduated from the AECC in 2009 and passed the American Chiropractic Neurology Board exams in 2014. He's currently undertaking a masters in MSK neuroscience and recently opened his own clinic in Woking, Surrey, which focuses on patients with chronic pain or dizziness.

Jake has been teaching seminars in the UK and Europe since 2015, and has spoken at the BCA and ECU conferences. He fervently believes that neuroscience helps us to understand and explain what our patients are experiencing and how to help them. Neurology lies at the heart of movement, balance, posture and pain. Understanding it can be the key to a great outcome and explain why a patient's symptoms haven't already resolved. Neurology doesn't need to be a dreaded subject, full of hard to read and remember words and pathways. It can be taught in a way that is logical, easy to learn and apply.

You can follow Jake at <https://www.facebook.com/bcneuro/>, where he regularly uploads videos and case presentations. If you have any questions or would like to contact him, you can reach him at jake@bcneuro.co.uk

ROBERT SULLIVAN Clinical Consultant, BSc.(Hons)., MSc. Surgery., DSc. Pod., M.Inst.ChP., FICHPA., FSSChP HCPC Reg.

Robert Sullivan is a progressive podiatric surgeon. He thinks outside the box and encourages other to do the same when it comes to client care. He has greatly expanded his scope of practice over the last 25 years to include pharmacology, diabetes related conditions, fat cell management, non-thermal laser interventions. Emeritus Dean of Education to one of Europe's leading Podiatry Institutes, Robert is a sought-after speaker in Europe, the Middle East and the USA.

An active researcher in the area of Non-Thermal Laser, his research includes, Onychomycosis, Diabetic peripheral neuropathy, pain and fat cell management.

Roberts special interests are:

- Non-Thermal Lasers
- Pain Management
- Fat Cell Management
- Immunology
