About the Webinar

This is a three-part series that looks at the science and evidence behind lasers used in general and specialised clinical practice including demonstrations where applicable. Founded on the science presented in the original 6-hour programme, this series builds on that science and presents practical way to include non-thermal low-level lasers into multidisciplinary practice.

- Lecture Part 2

An exploration of the scope of practice of NTLLL in modern therapeutics and the areas where this modality is most valuable. Is it possible that our bodies have everything we need for a happy health life, all that is missing is the inspiration for our bodies to act? Is NTLLL the missing link in the healthcare chain? Including a case history. 60 minutes plus 15 minutes for questions

About Dr Robert Sullivan

[Dr Robert Sullivan, BSc \(Hons\) Podiatry, MSc Podiatric Surgery, POMS](#) is a progressive podiatric surgeon. He thinks outside the box and encourages others to do the same when it comes to client care. He has greatly expanded his scope of practice over the last 25 years to include pharmacology, diabetes related conditions, fat cell management, non-thermal laser interventions. Emeritus Dean of Education to one of Europe's leading Podiatry Institutes, Robert is a sought-after speaker in Europe, the Middle East and the USA. An active researcher in the area of Non-Thermal Laser, his research includes Onychomycosis, Diabetic peripheral neuropathy, pain, immunology and fat cell management.
