About the Webinar

This is a **three-part series** that looks at the science and evidence behind lasers used in general and specialised clinical practice including demonstrations where applicable. Founded on the science presented in the original 6-hour programme, this series builds on that science and presents practical way to include non-thermal low-level lasers into multidisciplinary practice.

- Lecture Part 1

A review of the science and history that constitutes the discipline referred to as Photobiomodulation, and a look at the specific uses of lasers in medicine and allied healthcare. A case is presented in this hour to demonstrate the use of non-thermal Low-level laser (NTLLL). Each hour contains a case to showcase NTLLL and its potential scope of clinical practice. 60 minutes plus 15 minutes for questions

About Dr Robert Sullivan

[Dr Robert Sullivan, BSc \(Hons\) Podiatry, MSc Podiatric Surgery, POMS](#) is a progressive podiatric surgeon. He thinks outside the box and encourages others to do the same when it comes to client care. He has greatly expanded his scope of practice over the last 25 years to include pharmacology, diabetes related conditions, fat cell management, non-thermal laser interventions. Emeritus Dean of Education to one of Europe's leading Podiatry Institutes, Robert is a sought-after speaker in Europe, the Middle East and the USA. An active researcher in the area of Non-Thermal Laser, his research includes, Onychomycosis, Diabetic peripheral neuropathy, pain, immunology and fat cell management.
