AIC WEBINAR SERIES - ZOOM

Tuesday November 26th at 9pm (ROME TIMEZONE)

Diagnostics imaging on focus: Case studies, patient management, and optimal use guidelines

EAC/CPD APPLIED FOR

Ricardo Fujikawa graduated from Marilia School of Medicine in 1993 and completed medical residency in Internal Medicine and Haematology. In 2001, he earned his Doctor of Chiropractic degree (Magna Cum Laude) from Palmer College of Chiropractic, receiving several awards, including the John Connolly Memorial Award. He has served as president of the Brazilian Chiropractic Association and Head of Studies at Spain's first chiropractic program. Currently, he is associated faculty at Southern California University of Health Sciences and a lecturer and module leader at McTimoney College of Chiropractic – Madrid Campus. He also co-founded the Fujitega Research Foundation and remains active in chiropractic education globally.

Course Description: Diagnostic Imaging on Focus – Case Studies, Patient Management, and Optimal Use Guidelines

Summary of the Lecture:

This webinar will provide an in-depth exploration of diagnostic imaging as a critical tool for chiropractors. Focusing on real-world case studies, the lecture emphasizes how imaging can guide patient management decisions and optimize clinical outcomes. By reviewing practical examples, attendees will gain insights into when and how to best utilize imaging modalities such as X-rays, MRIs, and CT scans in chiropractic practice. Special attention will be given to integrating imaging results with clinical findings to form comprehensive care plans. Additionally, the session will cover optimal use guidelines to ensure effective, evidence-based, and patient-centered approaches.

Learning Objectives:

1. **Recognize the importance of diagnostic imaging** in patient management and its role in enhancing clinical decision-making.
2. **Evaluate case studies** to understand the appropriate use of imaging modalities in various clinical scenarios.
3. **Apply optimal use guidelines** for diagnostic imaging, ensuring adherence to evidence-based practices and improving patient outcomes.
4. **Integrate diagnostic imaging results** with clinical evaluations to formulate well-rounded chiropractic care plans.
5. **Enhance diagnostic skills** by identifying when imaging is indicated or contraindicated, balancing the benefits with potential risks to the patient.
