The Association of Italian Chiropractors is proud to offer you

## **AIC WEBINAR SERIES**

**Wednesday, February 18th, 7.30 p.m. - 9.30 p.m.**  
(ROME TIMEZONE)

### **“SPINAL MRI FOR CHIROPRACTORS”**

**RISHI BODALIA, DC, MS, DACBR, RMSK**

Dr. Rishi Bodalia is a highly accomplished Chiropractic Radiologist with a robust educational background that includes a Bachelor of Science from McMaster University, a Doctor of Chiropractic (DC) degree from Northeast College of Health Sciences (formerly New York Chiropractic College), and a Master of Science in Diagnostic Imaging from National University of Health Sciences. He earned his DACBR and RMSK certifications in 2021, marking his expertise in advanced imaging techniques. Driven by a passion for intellectual challenge and a deep commitment to patient care, Dr. Bodalia chose a career in radiology. The field offers him the perfect

blend of intellectual stimulation, the opportunity to make a significant impact on patient outcomes, a balanced lifestyle, and the chance to collaborate with other healthcare specialists. One of the most memorable moments in Dr. Bodalia's career was during his time in chiropractic college when a professor presented a case involving a tortuous vertebral artery with widening of the C2 transverse foramen. This case resonated deeply with him, solidifying his desire to pursue a career as a radiologist. Dr. Bodalia currently serves as an assistant professor at Palmer College of Chiropractic Florida Campus, where he teaches courses in diagnostic imaging, X-ray physics, X-ray positioning, and radiographic anatomy. In addition to his academic role, he is the co-owner and an instructor at Kinetic Sonography Institute, where he educates Chiropractors, Physical Therapists, and other healthcare providers on performing diagnostic ultrasound.

**Course description** Spinal MRI with emphasis on disc pathology and other clinically significant findings relevant to chiropractic practice. Participants will become familiar with spinal anatomy, biomechanics, and standardized MRI terminology for disc herniations, degenerative disc disease, and stenosis patterns. Case-based imaging will highlight disc pathology, red-flag features of cauda equina syndrome, and common neurogenic tumors, with emphasis on clinical correlation and appropriate management considerations.
